PROFILE

3rd Year B.Tech Computer Science Engineering student and aspiring Frontend Developer with hands-on experience in Python, Java, JavaScript and web development. Interested in building responsive web applications, solving programming problems with Java, and exploring AI/ML through practical projects.

EDUCATION

Uttaranchal University, Dehradun, India
B.Tech in Computer Science Engineering

2024 – 2028

SKILLS

- **Programming:** Java, Python, JavaScript
- **Web Development:** HTML5, CSS3, JavaScript, React.js, Node.js, Bootstrap
- **Databases:** MySQL, SQL, MongoDB
- **Tools:** Git, GitHub, VS Code, Postman
- **Core:** Data Structures and Algorithms, API Integration, Object-Oriented Programming
- **Exploring:** AI/ML, Spring Boot, MERN Stack

EXPERIENCE

Artificial Intelligence & Generative AI Intern
YBI Foundation / Remote

July 2025

- Completed a 1-month internship focused on Artificial Intelligence and Generative AI.
- Worked with Python, APIs, prompt engineering, generative AI tools, NLP and LLM concepts.
- Explored practical AI applications, model training concepts and responsible AI practices.

PROJECTS

- **Personal Portfolio Website – HTML, CSS, JavaScript** GitHub
- Built a responsive personal portfolio website to showcase technical skills, projects and contact information.
- **Real-Time Weather App – Python / API** Live
- Developed a weather application that retrieves real-time city weather information including temperature, humidity and wind speed through an API.
- **To-Do List App – HTML, CSS, JavaScript** Live
- Created an interactive task-management web application with a responsive interface for adding and managing daily tasks.
- **Diabetes Prediction – Python, Scikit-learn** GitHub
- Built a machine-learning project to predict diabetes risk using a trained classification model during the YBI Foundation internship.
- **DSA / LeetCode Solutions – Java** GitHub
- Practicing Data Structures and Algorithms in Java and maintaining solutions for programming problems on GitHub.

CERTIFICATIONS

- **Python (Basic):** HackerRank
- **Gen AI Exchange Hackathon:** Google Cloud Skills Boost
- **Generative AI:** YBI Foundation

ACHIEVEMENTS & ACTIVITIES

- **Hackathon:** Secured Rank 4 in the AI-WebForge Hackathon organized by Amity School of Engineering & Technology, Noida.
- **DSA:** Regularly practicing Java-based Data Structures and Algorithms and sharing solutions on GitHub.
- **Projects:** Built and deployed frontend projects including a personal portfolio, weather application and To-Do List application.
